

Reef Pin Bridle System:

Individual reef pins offer far superior holding, compared to the typical dead weight anchor. To multiply this holding power, joining 3 pins with our wire rope & chain mooring bridle can accommodate some of the larger vessels that visit your dive sites.

- All hardware is hot-dipped galvanized & sized to your requests.
- The hard shell trawl buoys suspend the tackle up off the reef.
- Both systems can be designed to be anti-theft.

What We Offer

- Complete mooring installations
- Helix & reef pin anchors
- Custom installation equipment
- Complete line of mooring tackle
- Installation training
- Mooring field consulting services
- Packaging & shipping
