

## Round Shaft No Wrench Helix Anchors:

Used for smaller boats and docks these anchors are installed without the need for specialty equipment. Simply place a pipe or rod through the eyelet and twist it in until the eyelet is right at ground level. Great in mud flats, shallow water. They can be installed in deeper water by a diver. Made in the USA!

The best solution for environmentally sensitive areas because after install the foot print of these anchors is only as big as the eyelet itself allowing plant and aquatic life to grow and live right around it.

Helix Diameter	Shaft size	Approx. break force
6"	3/4"x 4'	1500 lbs
8"	1"x 4'	2500 lbs
8"	1"x 5.5'	3000 lbs
10"	1 1/4"x 5.5'	3500 lbs
